

CAPABILITY STATEMENT

Innovative technology solutions | Cybersecurity | IT Modernization

Cage Code

24X89

Unique Entity ID

RSM6ZTV6HXV7

Primary NAICS

541511 – Custom Computer Programming Services

541512 – Computer Systems Design Services

541618 – Other Management Consulting Services

541513 – Computer Facilities Management Services

518210 – Data Processing, Hosting, and Related Services

611420 – Computer Training

Core Competencies

- Cybersecurity Risk Management
- Cyber-Supply Chain Risk Management (C-SCRM)
- IT Modernization & Digital Transformation
- Business Process Automation & Optimization
- Project Management and Support
- Application Design & Development
- UI Design, Prototyping, and Wireframing
- UX Design Approach

WHO WE ARE

Data Core Technologies (DCT) specializes in providing innovative and strategic technology solutions to meet the evolving needs of our clients. With a team of experienced and certified professionals, we offer a comprehensive range of services to help organizations optimize their IT infrastructures, protect their assets, and promote resiliency, compliance, and business continuity.

WHAT SETS US APART

We are dedicated to delivering customized and cost-effective solutions that enhance efficiency, security, and scalability.

We safeguard our clients' valuable information and digital assets, empowering them to focus on achieving their corporate objectives and advancing their global missions with confidence, knowing that their security and privacy are our top priorities.

With pride, we maintain our unwavering dedication to Integrity, Compliance, and Excellence. These core values define our culture and steer our engagements with employees, customers, and partners, fostering trust and confidence in every relationship.

LEADERSHIP EXPERIENCE & PAST PERFORMANCE

Our principals bring complementary offensive and defensive security expertise from federal engagements, including work for the Intelligence Community.

Kimberley Gometz – CEO | Service-Disabled Veteran

Kimberley is a Team Lead currently supporting a National Geospatial-Intelligence Agency (NGA) project. She specializes in offensive security, including penetration testing and red team operations, and is a cross-domain specialist for the Intelligence Community.

Martha Akalu – President | Information Assurance & Database Engineering

As a Subject Matter Expert (SME) in Information Assurance, Martha has assisted agencies including the National Reconnaissance Office (NRO) Cyber Security Office (CSO), NGA's Chief Information Officer Team (CIO-T), and the Department of State (DoS) Information Risk Management (IRM) office in implementing security best practices that improve security posture, system efficiency, and resilience.

As Lead Information Assurance, Martha developed and reviewed Security Authorization Packages for Assessment and Authorization (A&A) efforts under the NIST 800-37 Risk Management Framework (RMF) and FedRAMP requirements. As a Database Administrator/Developer, she supported the Army Publishing Directorate (APD), designing and implementing databases on SQL Server 2008 and IBM DB2 9 and maintaining database servers.
